

Initiative on Children's Environmental Health

of the Collaborative on Health and the Environment

Biweekly Bulletin August 11, 2010

This bulletin lists upcoming events plus recent announcements, news and journal articles, calls for proposals and other items related to children's environmental health. They are archived and searchable on our website:

http://www.healthandenvironment.org/working_groups/childrens_health/bulletins.

ICEH Highlights

New Members

The Initiative on Children's Environmental Health welcomes these new members:

- Emma Anglesey, Hobart, Australia
- Gloria Escobar-Chaparro, MA, East Elmhurst, New York
- Angelique Goetsch, Minot AFB, North Dakota
- Jamie Heeringa, Grand Rapids, Michigan
- Rebecca Meuninck, MA, Ann Arbor, Michigan
- Trey Meyer, Chattanooga, Tennessee
- Sarah Sisler, Candler, North Carolina
- Man Bahadur Thapa, Kathmandu, Nepal
- Sarah Wade, Santa Barbara, California
- Leigh Wilcox, Frisco, Texas

Announcements

A daily news feed with articles and announcements is available on CHE's website:
<http://www.healthandenvironment.org/news/announce>.

EPA sets first national limits to reduce mercury and other toxic emissions from cement plants.

This action sets the nation's first limits on mercury air emissions from existing cement kilns, strengthens the limits for new kilns, and sets emission limits that will reduce acid gases.

New consumer guide: PVC-Free School Supplies.

The Center for Health, Environment & Justice has published their third-annual Back-to-School Guide to PVC-Free School Supplies to empower parents to make smarter, healthier shopping choices for a toxic-free future.

[See a related article about health threats to students: [PCB threat lurks in Staten Island schools](#)]

EPA issues new guide to improving stormwater management local streams, Chesapeake Bay to benefit.

Improperly managed stormwater runoff from urbanized areas can damage streams, cause significant erosion, and carry excessive nutrients, sediment, toxic metals, volatile organic compounds, and other pollutants downstream.

Call for comments: EPA's Reanalysis of Key Issues Related to Dioxin Toxicity and Response to NAS Comments.

The deadline for comments has now been extended until September 20, 2010. EPA has

replaced the draft report (main) on June 9th with a copy with included links to the report's citations available as a reference from the HERO Database.

EPA report: 22 million cataract cases will be prevented by stronger ozone layer protection.

The EPA announced a new peer-reviewed report predicting that more than 22 million additional cataract cases will be avoided for Americans born between 1985 and 2100 due to the Montreal Protocol.

Updated Tables from CDC's National Health and Nutrition Examination Survey.

The Updated Tables, July 2010 provides additional data from the 2005-2006 survey period for 51 of the chemicals previously reported through 2004 in the Fourth Report and the new addition of four parabens and two phthalate metabolites in 2005-2006.

EPA rejects claims of flawed climate science.

After months of serious consideration of the petitions and of the state of climate change science, EPA's review shows that climate science is credible, compelling, and growing stronger.

[See a related article: [Scientists say soot a key factor in warming](#)]

New website: Healthy Food Action.

Healthy Food Action makes explicit the links between health, food and farm policy. Whether it's rising obesity in kids, the use of arsenic in animal feed, antibiotics being squandered to make livestock grow faster, or a Farm Bill that undercuts the nation's health, this site will provide timely information and make it easy to take action to influence public policy.

[See related articles: [Obesity rates keep rising, troubling health officials; Extra pregnancy pounds hurt baby: Study](#) and [Under fire, Health Department pulls back on arsenic report](#)]

EPA to hold listening sessions on potential revisions to water quality standards regulation.

Potential revisions include strengthening protection for water bodies with water quality that already exceeds or meet the interim goals of the Clean Water Act; ensuring that standards reflect a continued commitment to these goals wherever attainable; improving transparency of regulatory decisions; and strengthening federal oversight. The public listening sessions will be held via audio teleconferences on August 24 and 26, 2010, from 1 p.m. to 2:30 p.m. EDT.

Call for proposals: Climate Change and Health: Assessing and Modeling Population Vulnerability to Climate Change.

This FOA encourages research applications to examine the differential risk factors of populations that lead to or are associated with increased vulnerability to exposures, diseases and other adverse health outcomes related to climate change.

Job opening: Augusta, Maine.

The Natural Resources Council of Maine (NRCM) seeks an executive director. Current advocacy work focuses in four program areas: energy efficiency and clean renewable energy, protection from toxic chemicals in consumer products, protecting Maine's North woods, and ensuring healthy rivers and watersheds.

Job opening: Colorado Springs, Colorado.

The El Paso County Department of Health and Environment has an opening for an environmental health specialist in their Environmental Health Services program within the Disease Prevention and Control Division. The application deadline is August 30, 2010.

Job opening: Seattle, Washington.

US Environmental Protection Agency's Region 10, Office of Ecosystems, Tribal & Public Affairs, Ecosystems & Community Health Unit has an opening for an environmental protection specialist to serve as an environmental justice coordinator. Applications are due August 16, 2010.

Job openings: Oakland, California.

The UCSF Program on Reproductive Health and the Environment is seeking to fill two positions: 1) a postdoc to work on a project that addresses one key aspect of how to incorporate new and emerging science into environmental health policy and decision-making and 2) a research coordinator to assist in managing all phases of research activity. Contact Jason Harless: harlessj@obgyn.ucsf.edu.

Upcoming Events

Online Calendar. These and more upcoming events, including requests for proposals and abstracts, are listed in a searchable calendar:

1) Public Meetings on Hydraulic Fracturing Research Study

Thursday August 12, 2010

three sessions: 8:00 a.m. to noon, 1:00 - 5:00 p.m., and 6:00 - 10:00 p.m. Eastern time

Syracuse, New York

at the Oncenter Complex Convention Center (note the changed city and location)

Sponsor: US Environmental Protection Agency

EPA is hosting four public information meetings on the proposed study of the relationship between hydraulic fracturing and its potential impacts on drinking water. Hydraulic fracturing is a process that helps production of natural gas or oil from shale and other geological formations. By pumping fracturing fluids (water and chemical additives) and sand or other similar materials into rock formations, fractures are created that allow natural gas or oil to flow from the rock through the fractures to a production well for extraction. The meetings will provide public information about the proposed study scope and design. EPA will solicit public comments on the draft study plan. Stakeholders are requested to preregister for the meetings at least 72 hours before each meeting.

2) CHE Café Call: On the Ground in the Gulf Coast: A Conversation with Wilma Subra and Michael Lerner

Thursday August 12, 2010

10:00 a.m. Pacific / 1:00 p.m. Eastern time

Sponsor: Collaborative on Health and the Environment

Wilma Subra is one of the foremost resource scientists for low-income communities in the Gulf Coast. This MacArthur Prize-winning chemist has dedicated her career to helping low-income communities get the facts they need about their chemical exposures and the implications for their health. She has worked tirelessly since the BP oil disaster to help communities and disaster workers understand their exposures. This conversation will bring the CHE community up to date on her latest findings. Michael Lerner is vice-chair and co-founder of the Collaborative on Health and the Environment and president of Commonweal, a health and environment institute in Bolinas, California.

3) How Chemical Policy Reform Can Spur Green Chemistry

Thursday August 12, 2010

2:00 p.m. Eastern time

Sponsor: American Chemical Society

In the wake of the largest Gulf oil disaster or public concern over the chemicals in a baby bottle, how will changing legislation affect chemical professionals? Public policy has the potential to transform the chemical industries and set a new course for the next decade. Join our speaker, Richard Denison, and learn about the latest green chemistry policy developments (Safe Chemicals Act/TSCA reform) and how they may affect chemical professionals, chemical industries, and the future of green chemistry. Richard A. Denison is a senior scientist at the Environmental Defense Fund.

4) Get a HANDLE on Neurodevelopmental Differences

Saturday and Sunday, August 14 - 15, 2010

Sarasota, Florida

at the Fountains at Lake Pointe Woods, 7979 South Tamiami Trail

Sponsor: The HANDLE Institute

This hands-on workshop introduces an interactive approach for identifying and addressing underlying causes of learning and social difficulties related to attentional disorders (ADD/ADHD) brain injury; autism; motor problems and hypersensitivities; learning challenges; dyslexia; OCD, anxiety disorders, and other behavioral or developmental challenges, issues of aging and more.

Price: Please contact the instructor regarding costs for this course.

5) Public Listening Sessions on Potential Revisions to Water Quality Standards Regulation

Tuesday August 24 and Thursday August 26, 2010

1 p.m. to 2:30 p.m. Eastern time

Sponsor: US Environmental Protection Agency

The US Environmental Protection Agency (EPA) will hold two public listening sessions on potential changes to the water quality standards regulation before proposing a national rule. The current regulation, which has been in place since 1983, governs how states and authorized tribes adopt standards needed under the Clean Water Act to protect the quality of their rivers, streams, lakes and estuaries. Potential revisions include strengthening protection for water bodies with water quality that already exceeds or meet the interim goals of the Clean Water Act; ensuring that standards reflect a continued commitment to these goals wherever attainable; improving transparency of regulatory decisions; and strengthening federal oversight. Water quality standards are the foundation of the water quality-based approach to pollution control, including Total Maximum Daily Loads and National Pollutant Discharge Elimination System permits. Standards are also a fundamental component of watershed management. At the sessions, EPA will provide a review of the current regulation and a summary of the revisions the agency is considering. Clarifying questions and brief oral comments (three minutes or less) from the public will be accepted at the sessions, as time permits. EPA will consider the comments received as it develops the proposed rulemaking. EPA will also hold separate listening sessions for state, tribal and local governments.

6) Wireless SmartMeters: What Are the Health, Personal Safety, Wireless Security and Excessive Billing Issues All About? What Can Consumers Do Now?

Wednesday August 25, 2010

11:00 a.m. Pacific / 2:00 p.m. Eastern time

Sponsor: Collaborative on Health and the Environment Working Group on Electromagnetic Fields (CHE-EMF)

CHE-EMF has been a leading international forum for expert dialogue on EMF concerns. A major new concern has emerged, especially in California, where PG&E is requiring that all homes and businesses install wireless "SmartMeters" that represent a major new source of EMF exposure. At present, PG&E offers no way for concerned individuals, organizations and communities to opt out. A sizable grassroots protest movement has emerged in California challenging PG&E's SmartMeter requirement on health, privacy, financial, fire hazard and other grounds. Our particular concern at CHE is the health risks these meters may pose through life-long exposure to this new and significant EMF source, especially in the home. Cindy Sage is cofacilitator of CHE EMF and lead cofounder of Biolnitiative.org, a multi-author report on EMF concerns that is widely recognized as an international science resource. On this call, Cindy will present a summary review of the concerns with SmartMeters. Michael Lerner will explore some of these concerns with her and then open the dialogue to all participants.

8) Coal Combustion Residuals (CCR) - Public Hearing

Monday August 30, 2010

The hearing will have a morning, afternoon and evening session, starting at 10:00 a.m. and ending at 9:00 p.m. or later depending on the number of speakers.

Arlington, Virginia

at the Hyatt Regency Crystal City, 2799 Jefferson Davis Highway

Sponsor: US Environmental Protection Agency Office of Resource Conservation and Recovery

This is one in a series of hearings that will provide interested persons the opportunity to present their views on the proposed rule: *Identification and Listing of Special Waste:*

Disposal of Coal Combustion Residuals from Electric Utilities, also known as the coal combustion residuals rule, the CCR rule or the coal ash rule. Speakers will have three minutes to present their views. EPA will also accept written statements. Preregistration is requested.

9) School Health Policies and Program Study 2006: Healthy Physical School Environment

Tuesday August 31, 2010

2:00 - 3:00 p.m. Eastern time

Sponsor: American Association on Intellectual and Developmental Disabilities Environmental Health Initiative

As society continues to focus on the importance of academic achievement, the physical environment of schools should be addressed as one of the critical factors that influence academic outcomes. The School Health Policies and Programs Study (SHPPS) is a national survey periodically conducted to assess school health policies and programs at the state, district, school and classroom levels. SHPPS 2006 provides a comprehensive look at the extent to which schools have health-promoting physical school environment policies and programs. This presentation will provide an overview of SHPPS and findings for topics such as inspection of school physical facilities; school plans for dealing with mold and moisture-related issues; indoor air-quality management; pest management procedures; purchase of low-emitting products; testing of drinking water; and the use, labeling, storage, and disposal of hazardous materials. This is a rescheduling of a teleconference from mid July.

Price: free

News and Journal Articles

Oil sands toxics growing rapidly.

Tuesday, August 10, 2010

Canada's oil sands mining operations produce vast and fast-growing quantities of deadly substances, including mercury, heavy metals and arsenic, new data released by Environment Canada shows. Toronto Globe and Mail, Ontario.

Fluoride helps, officials say, but fears persist.

Tuesday, August 10, 2010

The CDC has recognized water fluoridation as "one of 10 great public health achievements of the 20th century" because it has reduced cavity rates. Some communities, though, are reluctant to add fluoride to their water systems because of campaigns claiming fluoride is dangerous. Gainesville Sun, Florida.

Mystery rise in children suffering food allergies.

Tuesday, August 10, 2010

Hospital admissions for food allergies among children have risen by 500 percent in the

last 20 years but doctors do not understand what is driving the increase. Experts say that even these figures underestimate the true incidence of the condition. London Independent, United Kingdom.

Epidemiologic evidence on the health effects of perfluorooctanoic acid (PFOA).

Friday, July 30, 2010

Epidemiologic evidence remains limited, and to date data are insufficient to draw firm conclusions regarding the role of PFOA for any of the diseases of concern. Environmental Health Perspectives.

Computational toxicology: Realizing the promise of the toxicity testing in the 21st century.

Friday, July 30, 2010

Even though the application of computational toxicology to environmental health decisions requires additional efforts, the merger of the power of computers with biological information is poised to deliver new tools and knowledge. Environmental Health Perspectives.

Prescription: More sun.

Thursday, July 29, 2010

If Stubbs is right about the autism/Vitamin D link, he and a growing legion of scientists across the country might also be right about their larger theory -- that lack of sun exposure and Vitamin D explains Oregon's high rates of depression, multiple sclerosis, bone disease, cancers and dozens of other maladies, including colds and flu. Portland Tribune.

NYC looks to stop spreading bedbug infestations.

Thursday, July 29, 2010

One of every 15 New Yorkers battled bedbugs last year, officials said Wednesday as they announced a plan to fight the spreading infestation, including a public-awareness campaign and a top entomologist to head the effort. Associated Press.

Climate change exacerbates disparate health conditions among vulnerable populations, experts say.

Wednesday, July 28, 2010

Whatever the reason for extreme weather conditions, whether it is hurricanes or sweltering heat, one thing is certain, researchers say: their impact is greatest on children and other vulnerable populations. Diverse: Issues In Higher Education.

Gas drilling companies claim to use safer chemicals.

Wednesday, July 28, 2010

In Texas and across the country, controversy is escalating over the practice of "fracking," which involves shooting water, sand and chemicals far underground to retrieve natural gas. Texas Tribune.

The Collaborative on Health and the Environment offers this information as a service but does not endorse any of the events, articles or announcements.

Companion bulletins are available for different audiences:

- For those interested in environmental health as it relates to learning and developmental disabilities: <http://www.iceh.org/LDDIbulletins.html>
- For those interested in environmental health in Washington State and the Pacific Northwest: <http://washington.chenw.org/bulletins.html>

While there is overlap with this bulletin, there are some events and announcements unique to those bulletins.

If you would like to join the Collaborative on Health and the Environment (CHE) and the ICEH Working Group, please complete the application on the CHE website: <http://www.healthandenvironment.org/application> Joining CHE means receiving up to four email messages a month from the CHE National listserv. CHE costs nothing to join and the benefit is shared information and opportunities for further engagement, if you choose. Be sure to mark that you want to join the Initiative on Children's Environmental Health Working Group at the bottom of the application.
