# Children First: Promoting Ecological Health for the Whole Child

Friday October 1, 2010

8:00 a.m. - 5:00 p.m.

University of California, San Francisco

Pediatric integrative medicine embraces a holistic, whole-child approach, specifically examining the context – the ecology – in which optimal health and wellness is promoted. This groundbreaking one-day symposium will highlight a range of interacting factors that influence child health and development as well as model programs designed to provide healthy, sustainable environments for all children and future generations.

Early Bird Registration only \$35 until July 1st!
