Environmental Influences on Neurodevelopment: Translating the Emerging Science into Public Health Policy

**Thursday, January 12, 2012
Los Angeles, California**

*Box lunches available at noon
1:00-5:00 PM*

In this half-day workshop, national experts from diverse sectors will highlight the latest research on associations between environmental exposures and early neurodevelopment as well as the implications for prevention-based public health policy. This meeting is intended to catalyze cross-discipline discussions among leaders in environmental, experimental and epidemiologic fields as well as those involved in public policy and environmental health advocacy.

The workshop is open to the public. Faculty, students, policy makers, and others concerned with environmental influences on neurodevelopment and public health are particularly encouraged to attend.

Featured Speakers:

Linda Birnbaum, PhD, DABT, ATS, Director, National Institute on Environmental Health

Richard Denison, PhD, Senior Scientist, Environmental Defense Fund

Brenda Eskenazi, PhD, Director, Children's Center for Environmental Health, University of California at Berkeley School of Public Health

Irva Hertz-Picciotto, PhD, MPH, Professor and Chief, Division of Environmental and Occupational Health, UC Davis

Peggy Honein, PhD, MPH, National Center on Birth Defects

Richard Jackson, MD, MPH, Professor and Chair, Environmental Health Sciences, UCLA School of Public Health

Bruce Lanphear, MD, MPH, Child & Family Research Institute, British Columbia Children's Hospital and Simon Fraser University

Timothy Malloy, JD, Faculty Director, UCLA Sustainable Technology and Policy Program
