Original Nurser (drop in plastic bag inserts)		4 oz & 8 oz \$4.99 (Walgreen)
Platex Insulator		8 oz 1 \$5.60 (netkidswear.com)

*Clear View bottles were previously made of polycarbonate. However, bottles with manufacturing dates after 6/15/05 are made of polypropylene. (parentsresource.gerber@gerber.com)

**Bottles made by the listed manufacturers, such as Gerber, can contain either bisphenol-A or polypropylene. A lack of labeling prevents consumers from discerning whether they have purchased a bisphenol-A bottle or polypropylene bottle. As a general rule, the plastic making up the polypropylene bottles is cloudy and squeezable, whereas the polycarbonate plastic bottle containing bisphenol-A is generally clear and very hard. Above we have listed specific bottles that are made from polypropylene.
