

Partnership Call Resources

Here's a diagram of how things work re: partnership calls and articles and PDFs linked therefrom...

Examples:

- **Partnership call page** ~ ex. June 14 link (http://www.healthandenvironment.org/articles/partnership_calls/40?)
- **Partnership call resources** ~ ex. June 14 Background/Information Resource link
- **Add'l pages/articles at healthandenvironment.org** ~ ex. Click on the June 14 Background/Information Resource link and then scroll down and click on "Synergistic effects of toxic metals (mercury, lead, aluminum)"
- **PDFs at healthandenvironment.org** ~ Click on "Low-Level Environmental Lead Exposure and Children's Intellectual..." at http://www.healthandenvironment.org/articles/call_resources/52?

How to add a Partnership Call Resources page:

1. Log in and visit the Partnership call page for which you'd like to add a Call resources page. Copy the URL of the page.
2. Click "Create new resources page." Scroll down and enter the URL from step #1 in the Call link field. (The purpose of this step is to supply the breadcrumb link that leads to the Partnership call page associated with this particular Call resources page.)
3. Enter the title, body and date (use the calendar tool). To migrate existing content to the new site, you can paste into the body the content from the corresponding cheforhealth.org page.
