

Learning and Developmental Disabilities Initiative

[of the Collaborative on Health and the Environment](#)

Biweekly Bulletin October 6, 2010

This bulletin lists upcoming events plus recent announcements, news and journal articles, calls for proposals and other items related to learning and developmental disabilities and environmental health. They are archived and searchable on LDDI's website:
www.healthandenvironment.org/working_groups/learning/r/bulletins

LDDI Highlights

AAIDD Environmental Health Initiative Aging, Environmental Health, and IDD Teleconference Series

This fall, the American Association on Intellectual and Developmental Disabilities (AAIDD) with Greater Boston Physicians for Social Responsibility (PSR) and CHE's Learning and Developmental Disabilities Initiative and Healthy Aging Initiative, along with our distinguished panels of guest speakers, bring you a groundbreaking series of teleconference calls on aging, environmental health and intellectual and developmental disability. The first two calls:

1) "Environmental Threats to Healthy Aging" with Ted Schettler and Maria Valenti

Tuesday October 12th, 2:00-3:00 p.m. Eastern time

The report Environmental Threats to Healthy Aging, provides compelling evidence that environmental factors play a major role in the overwhelming majority of cases of Alzheimer's and Parkinson's diseases, even in people who are genetically predisposed. The report explains how diet, exercise, exposure to toxic chemicals, and socioeconomic stress across the lifespan can change biological pathways to influence the risk of these and other chronic diseases including diabetes, obesity, and cardiovascular disease - themselves risk factors for neurodegeneration. Fortunately, there is much that we can do to avoid those health problems and greatly improve the odds for delaying or even preventing disease onset - as a society, as individuals, and as family members. [Register for this call.](#)

2) "Built Environment" with Kathy Sykes, Rodney Harrell and Regina Gray

Tuesday October 19th, 2:00-3:00 p.m. Eastern time

Can changes to the built environment improve health and well-being for older adults and persons of all ages? Can those changes also mitigate climate change and lead to greater sustainability. The presentation will explore the answers to those questions. It will examine threats to healthy aging in communities that include the physical and natural environments in which people live, work, study and recreate. We will look at air pollution, extreme heat events related to the built environment, drinking water contaminants, and conditions exacerbated by a poor or dangerous built environment including isolation and lack of physical activity etc. We will discuss strategies for interventions by government, the private sector and citizens including planning and design of "healthy" housing in advantageous locations such as near services and transit, building "Complete Streets" and connective street and transit networks, and fostering a healthier environment by reducing environmental health hazards, supporting environmental justice, and encouraging physical activity. [Register for this call.](#)

Other calls in the series:

3) "Psychosocial Environment" with Danny George and Peter Whitehouse
Tuesday October 26th, 2:00-3:00 p.m. Eastern time

4) "Chemical Environment" with Maye Thompson and Marybeth Palmigiano
Tuesday November 2nd, 2:00-3:00 p.m. Eastern time

5) "Food Environment" with Michelle Gottlieb and Emma Sirois
Tuesday November 9th, 2:00-3:00 p.m. Eastern time
For more information, please visit AAIDD's [Teleconference webpage](#).

New Members

The Learning and Developmental Disabilities Initiative welcomes these new members:

- Lauren Clyde, Petaluma, California
- Phanimohan Krishna, Chennai, India
- Jo Miller, Sartell, Minnesota
- Irene Solnik, MS, Bay City, Texas

Announcements

A daily news feed with articles and announcements is available on CHE's website:

<http://www.healthandenvironment.org/news/announce>.

New Healthy Aging and the Environment Initiative.

The Collaborative on Health and the Environment has launched a new initiative on Healthy Aging and the Environment to build on the seminal work instigated by the *Healthy Aging* report and continue to develop a set of "ecological" approaches to healthy aging.

New program: Eco-Healthy Child Care.

The Children's Environmental Health Network (CEHN) today launches its national Eco-Healthy Child Care program (EHCC), which encourages healthier child-care settings by training child-care providers to protect children and staff from harmful chemical exposures -- from bisphenol-A in plastic food containers, PVC in toys, and formaldehyde in commonly used furniture to lead and mercury -- with free or low-cost alternatives that are easy to implement.

National Lead Poisoning Prevention Week, October 24-30, 2010.

CDC and HHS share the goal of eliminating childhood lead poisoning in the United States and have developed a NLPPW Campaign Toolkit to encourage information-sharing, collaboration, and promotion of NLPPW and lead poisoning prevention in general.

New online resource: Take Back Your Meds.

This site raises awareness about the importance of safe disposal of leftover and expired medicines to protect our kids, families and environment. It explains how to properly dispose of unwanted prescription and over-the-counter medicines, provides info about temporary take-back locations that are working in 11 Washington counties, and explains why Washington State needs a statewide medicine take-back program.

[See a related announcement: [EPA urges citizens to clear out medicine cabinets for drug take-back events](#)]

EPA observes Children's Health Month/President proclaims Oct. 4 as Children Health Day.

As President Obama proclaims today as Children Health Day, the U.S. Environmental Protection Agency (EPA) is working with its partners to expand the conversation on what all of us can do to protect children from environmental health hazards.

EPA will propose rule to protect waterways by reducing mercury from dental offices.

EPA expects to propose a rule next year and finalize it in 2012. Dental offices will be able

to use existing technology to meet the proposed requirements.

[See a related announcement: [EPA proposes to cut mercury emissions from sewage sludge incinerators](#)]

New report: Coal Ash: The Toxic Threat to Our Health and Environment.

Many people are still not aware of how toxic coal ash is, much less how much coal ash is generated each year and how grossly mismanaged its disposal is.

Call for abstracts: 3rd Annual Northwest Environmental Health Conference.

The Northwest Environmental Health Conference Planning Team is accepting abstracts for presentations at our 3rd Annual Conference to be held in Portland, Oregon, February 11, 2011. Submissions are due Friday November 12, 2010.

Call for proposals: Pesticide Incident Surveillance Program (PSP).

The Office of Pesticide Programs (OPP) is soliciting applications from state or local government public health authorities to support state pesticide incident surveillance efforts. Applications must be submitted through Grants.gov on or before 5:00 PM Eastern time on November 4, 2010.

Job opening: Washington, DC.

The United Nations Foundation is seeking an executive director to develop and lead a new Global Alliance for Clean Cookstoves. The Alliance seeks to save lives, improve livelihoods, empower women, and combat climate change by creating a thriving global market for clean and efficient household cooking solutions.

Job opening: Lowell, Massachusetts.

The University of Massachusetts Lowell Toxics Use Reduction (TUR) Program is seeking a manager to develop and deliver, and coordinate the development and delivery, of courses and workshops for toxics use reduction planners. The application deadline is September 30, 2010.

Job opening: Australia.

This environmental health officer position is part of a team of public health practitioners and integrated service teams who plan, develop, implement and evaluate environmental health promotion, protection and enforcement programs and activities to protect the public from physical, chemical, biological and radiological agents in the environment which may adversely impact on human health. This is a targeted position for aboriginal and/or Torres Strait Islander people to apply. Applications are due October 22nd.

Job opening: North Carolina

Toxic Free NC is North Carolina's only organization working to put people before pesticides, by advocating for common-sense alternatives that protect our health and environment. As part of their expansion of mission and programs, they have created a new assistant director position that will begin on or around December 1, 2010. The application deadline is October 15th.

Upcoming Events

Online Calendar. These and more upcoming events are listed in a searchable calendar: <http://www.healthandenvironment.org/cgi-bin/searchevents.cgi>. The calendar now lists deadlines for funding proposals and conference abstracts.

1) Revealing Socioeconomic Factors That Influence Your Health

Thursday October 7, 2010

8:00 - 10:30 a.m.

Saint Paul, Minnesota

at the Wilder Center, 451 Lexington Parkway North

Sponsor: Blue Cross and Blue Shield of Minnesota Foundation and Twin Cities Compass

Be among the first to learn about key findings from a new report, *The distribution of unequal health in the Twin Cities*, prepared by Wilder Research, commissioned by Blue Cross and Blue Shield of Minnesota Foundation. Learn about links between health outcomes and income, education, neighborhood conditions, and race in the Twin Cities. Then stay for a provocative panel discussion about ways to reduce health inequities including policy changes that can make the Twin Cities healthier for everyone.

Price: free, but preregistration is requested

[Visit the website](#)

2) Environmental Threats to Healthy Aging, with Ted Schettler and Maria Valenti

Tuesday October 12, 2010

2:00 - 3:00 p.m. Eastern time

Sponsor: Association on Intellectual and Developmental Disabilities (AAIDD) with Greater Boston Physicians for Social Responsibility and the Collaborative on Health and the Environment's Learning and Developmental Disabilities Initiative and Healthy Aging Initiative

The report *Environmental Threats to Healthy Aging* provides compelling evidence that environmental factors play a major role in the overwhelming majority of cases of Alzheimer's and Parkinson's diseases, even in people who are genetically predisposed. The report explains how diet, exercise, exposure to toxic chemicals, and socioeconomic stress across the lifespan can change biological pathways to influence the risk of these and other chronic diseases including diabetes, obesity, and cardiovascular disease - themselves risk factors for neurodegeneration. Fortunately, there is much that we can do to avoid those health problems and greatly improve the odds for delaying or even preventing disease onset - as a society, as individuals, and as family members.

3) First Regional Health Sciences and Nursing Conference 2010

Tuesday through Thursday, October 12 - 14, 2010

Shah Alam, Selangor Malaysia

at the SACC Convention Centre

Sponsor: Universiti Teknologi MARA

The conference is designed to address health problems and issues related to environmental health, medical imaging, medical technology, nursing, nutrition and dietetics, occupational therapy, optometry and physiotherapy. Other related fields are also welcomed.

Price: see the website

4) Atmospheric Toxics Webinar Series: Great Lakes Mercury Research Synthesis

Wednesday October 13, 2010

10:00 a.m. - noon Eastern time

Sponsor: Great Lakes Commission

Over the last six years, the Great Lakes Commission (GLC), under funding from the US Environmental Protection Agency (USEPA) and in cooperation with the eight Great Lakes states, has awarded research grants dealing with atmospheric toxic pollutants affecting the Great Lakes and their tributary watersheds. Thirty-five research grants have been awarded since 2004 addressing a diverse array of research concerning atmospheric pollutant loadings and movement within the basin and the associated impacts of

numerous persistent, bioaccumulative, and toxic (PBT) chemicals on wildlife and human health. A substantial amount of new scientific knowledge has been attained through these research activities. The GLAD webinar series is intended to provide a forum for GLAD Principal Investigators (PIs) to disseminate information on their respective research activities, including specific findings, recommended follow-up actions, and potential public policy actions to foster elimination of PBT threats to the region. David Evers, PhD, will present "Great Lakes mercury research synthesis" and Kevin Crist, PhD, will present "Mercury fate, transport, depositional patterns, and major source characterization in the Great Lakes region."

5) Are Vaccines Safe and Effective? An Educational Opportunity for Parents and Practitioners

Wednesday October 13, 2010

6:30 - 9:30 p.m.

New York, New York

at the Philip Colloff Center, 219 Sullivan Street

Sponsor: Lawrence B. Palevsky, MD, FAAP

In this workshop, you will hear discussions on vaccine science: 1) What is current vaccine science and who is funding it and doing it? 2) How do vaccines work, and have they done, and do they do what we're told they do? 3) What role do vaccine ingredients play when injected into infants and children? 4) What do the ingredients do to our children once they're injected? 5) Do vaccines contribute to the development of chronic illnesses in children? 6) How do our children get into school if they're not vaccinated? 7) How does the immune system work in babies and children? Attendees will hear some of the answers to these questions, along with the research that questions whether vaccines are safe and effective, and whether the scientific process is even at work to prove the answers to these questions. Attendees will also be asked to look at the issues that drive us to make the decisions we make, many of which come to us through fear, bullying, uncertainty and a lack of knowledge, and to perhaps think alternatively about how illnesses occur and disappear.

Price: \$35 per ticket or \$60 per couple from the same household

6) Built Environment, with Kathy Sykes, Rodney Harrell and Regina Gray

Tuesday October 19, 2010

2:00 - 3:00 p.m. Eastern time

Sponsor: Association on Intellectual and Developmental Disabilities (AAIDD) with Greater Boston Physicians for Social Responsibility and the Collaborative on Health and the Environment's Learning and Developmental Disabilities Initiative and Healthy Aging Initiative

Can changes to the built environment improve health and well-being for older adults and persons of all ages? Can those changes also mitigate climate change and lead to greater sustainability? The presentation will explore the answers to those questions. It will examine threats to healthy aging in communities that include the physical and natural environments in which people live, work, study and recreate. We will look at air pollution, extreme heat events related to the built environment, drinking water contaminants, and conditions exacerbated by a poor or dangerous built environment including isolation and lack of physical activity, etc. We will discuss strategies for interventions by government, the private sector and citizens including planning and design of "healthy" housing in advantageous locations such as near services and transit, building "Complete Streets" and connective street and transit networks, and fostering a healthier environment by reducing environmental health hazards, supporting

environmental justice, and encouraging physical activity.

7) CDC Healthy Homes Meeting

Tuesday and Wednesday, October 19 - 20, 2010

Atlanta, Georgia

at the Westin Atlanta Perimeter North

Sponsor: Centers for Disease Control and Prevention, Healthy Homes and Lead Poisoning Prevention Program

The goal of the meeting is to build on knowledge gained from our childhood lead poisoning prevention activities to enhance healthy homes program planning and facilitate dialogue around healthy homes initiatives. The agenda will be posted on the website.

Price: free

8) Psychosocial Environment, with Danny George and Peter Whitehouse

Tuesday October 26, 2010

2:00 - 3:00 p.m. Eastern time

Sponsor: Association on Intellectual and Developmental Disabilities (AAIDD) with Greater Boston Physicians for Social Responsibility and the Collaborative on Health and the Environment's Learning and Developmental Disabilities Initiative and Healthy Aging Initiative

In this presentation we will explore the intergenerational approach to creating psychosocial learning environments and communities. Human beings, both in our evolution as hunter-gatherers and then in agrarian societies, have existed in communities composed of adults, children, and elders. Not surprisingly, a growing body of research demonstrates the biopsychosocial benefits of intergenerational engagement for persons in their late life stages. However, urbanization and changing demographics in modern societies have served not only to intensify the environmental threats to healthy aging, but have also disrupted possibilities for human connection across the generations. We will review the relationship between psychosocial environments and brain health, but also focus on deeper and broader aspects of brain health including the strong and sustaining sense of purpose and usefulness that human beings manifest in community. We then turn our attention to current international efforts to develop intergenerational programs that support brain health and healthy aging, spotlighting our experiences at The Intergenerational School (TIS), a 10-year old public school in Cleveland, Ohio that provides a shared learning environment for children, young adults, middle-aged adults, and elders.

9) Atmospheric Toxics Webinar Series: Brominated Flame Retardants (BFRs) & Polycyclic Aromatic Hydrocarbons (PAHs)

Wednesday October 27, 2010

2:00 - 4:00 p.m. Eastern time

Sponsor: Great Lakes Commission

Over the last six years, the Great Lakes Commission (GLC), under funding from the US Environmental Protection Agency (USEPA) and in cooperation with the eight Great Lakes states, has awarded research grants dealing with atmospheric toxic pollutants affecting the Great Lakes and their tributary watersheds. Thirty-five research grants have been awarded since 2004 addressing a diverse array of research concerning atmospheric pollutant loadings and movement within the basin and the associated impacts of numerous persistent, bioaccumulative, and toxic (PBT) chemicals on wildlife and human health. A substantial amount of new scientific knowledge has been attained through

these research activities. The GLAD webinar series is intended to provide a forum for GLAD Principal Investigators (PIs) to disseminate information on their respective research activities, including specific findings, recommended follow-up actions, and potential public policy actions to foster elimination of PBT threats to the region. Stuart Batterman, PhD, will present "BFR emission rates from sources in the Great Lakes basin" and Michelle Homan, PhD, will present "Evaluation of the extent and transport of PAHs in Lake Erie basin."

10) The Intimate Ecology of Motherhood with Dr. Sandra Steingraber

Thursday October 28, 2010

7:30 p.m.

San Francisco, California

at the Jewish Community Center San Francisco, 3200 California Street

Sponsor: EcoBirth

In her electrifying book, *Having Faith: An Ecologist's Journey to Motherhood*, Sandra Steingraber, award-winning writer, mother, and biologist, explores the intimate ecology of motherhood. Both a memoir of her own pregnancy and an investigation of fetal toxicology, *Having Faith* reveals the extent to which environmental hazards now threaten each stage of infant development. In the eyes of an ecologist, the mother's body is the first environment for life. An enthusiastic and sought-after public speaker, Steingraber has keynoted conferences on human health and the environment. She is recognized for her ability to serve as a two-way translator between scientists and the common culture. Steingraber will be joined with a panel of local experts from the environmental, birthing and academic communities.

Price: \$18

Contact: Jewish Community Center of San Francisco, 415-292-1200 or info@jccsf.org

11) Chemical Environment, with Maye Thompson and Marybeth Palmigiano

Tuesday November 2, 2010

2:00 - 3:00 p.m. Eastern time

Sponsor: Association on Intellectual and Developmental Disabilities (AAIDD) with Greater Boston Physicians for Social Responsibility and the Collaborative on Health and the Environment's Learning and Developmental Disabilities Initiative and Healthy Aging Initiative

Modifiable lifetime environmental factors that influence healthy aging include exposure to toxic chemicals. The US imports or produces approximately 42 billion pounds of chemicals daily. Synthetic chemicals contaminate every ecosystem - air, water, soil and food - in the world. Virtually all people and wildlife are regularly exposed to a complex mixture of industrial chemicals that did not exist before World War II. Studies of newborns' umbilical cord blood show they have been exposed to industrial contaminants in the womb. Most industrial chemicals in the workplace and in consumer products have not undergone even basic toxicity screening. Only a few of 200 chemicals known to be neurotoxic to humans have been evaluated for their impacts on the developing brains of children or aging brains of adults. Data that do exist show that exposures to environmental chemicals can increase the risk of many diseases and conditions relevant to an aging population, including neurodegenerative disorders, cardiovascular disease, hypertension, and diabetes. In this presentation we will review toxic chemicals and their effect on health throughout the lifespan with a particular emphasis on obesity, diabetes, cardiovascular disease and neurodegeneration including Alzheimer's and Parkinson's diseases. Additionally we will discuss current state and national efforts to reform chemical policy.

12) NADD Annual 27th Conference & Exhibit Show for 2010

Wednesday through Friday, November 3 - 5, 2010

Seattle, Washington

at the Renaissance Seattle Hotel

Sponsor: National Association for the Dually Diagnosed

Presentation categories include 1) Presentation/Skill Building Workshop, 2) Research Symposium and 3) Poster Session. Presentations are invited in a variety of topics, including environmental health.

Price: unknown

Contact: Ed Seliger, eseliger@thenadd.org

13) International Congress on Environmental Health

Thursday through Saturday, November 4 - 6, 2010

Coimbra, Portugal

at the College of Health Technologies of Coimbra

Sponsor: Department of Environmental Health, College of Health Technologies of Coimbra, College of Health Technologies of Lisbon, College of Health Technologies of Oporto, College of Health of Beja

The International Congress on Environmental Health offers an opportunity for all those involved in environmental health to present their work, share expertise and promote partnerships at a nationwide context, thus providing a current snapshot of this interdisciplinary field.

Toxic overflow Part 1.

Wednesday, September 22, 2010

The contamination of many First Nations by unregulated landfills and dumps is a dirty story that has yet to be fully told. Aside from the mess you can see -- and smell --the risk of groundwater pollution is probably the most severe environmental impact from these waste sites. Aboriginal Peoples Television Network.

The Collaborative on Health and the Environment offers this information as a service but does not endorse any of the events, articles or announcements.

Companion bulletins are available for different audiences:

- For those interested in general children's environmental health: http://www.healthandenvironment.org/working_groups/childrens_health/bulletins
- For those interested in environmental health in Washington State and the Pacific Northwest: <http://washington.chenw.org/bulletins.html>

While there is overlap with this bulletin, there are some events and announcements unique to those bulletins.

If you would like to join the Collaborative on Health and the Environment (CHE) and the LDDI Working Group, please complete the application on the CHE website: <http://www.healthandenvironment.org/application> Joining CHE means receiving up to four email messages a month from the CHE National listserv. CHE costs nothing to join and the benefit is shared information and opportunities for further engagement, if you choose. Be sure to mark that you want to join the Learning and Developmental Disabilities Initiative Working Group at the bottom of the application.
